Home Page

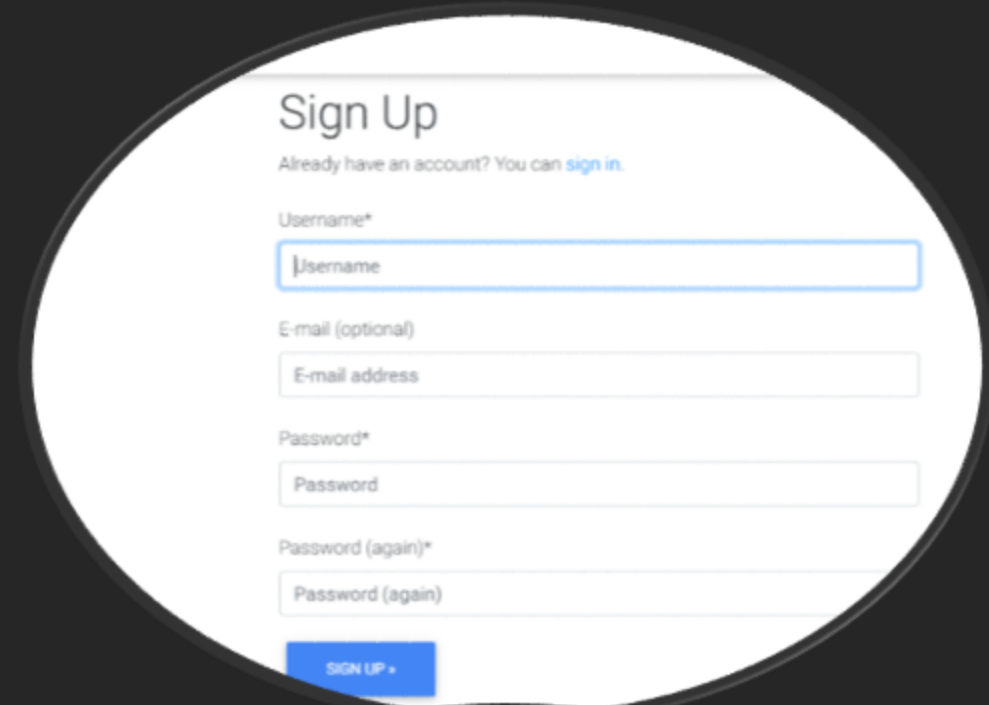

The home page includes all the products for our website, there is a cart, log in/ create account area at the top right corner. We optimized the homepage imported from our chosen UI kit by replacing repeating code with a loop. We then edited the sections in the code about the arrows at the bottom of the page and the image sources to better fit our website.

Account Creation & Log in

Creating your account is simple and easy. Saving all your data in our database is securely encrypted for the protection of your personal information. By logging in, you can browse through our fine selection and save anything to your cart. Upon checking out, your information will be saved, and items will about forever to never be shipped. Your account makes you a premiere customer which means you get to enjoy the perks of a full member. This ranges from being able to browse the inventory to selecting items for your purchase. All accounts are free, and you will never need to pay.

To create this page, we edited the navbar so that the proper pages would appear when they were clicked. We then utilized the templates provided by allauth and crispy-forms as necessary to make the pages work properly. Lastly, we made it so that the buttons redirected the user to the proper page in base.py.
